

Biological Weapons Convention in September | [Jan 12, 2023](#) | ([Gab](#))

- evidence and documents collected by Russia in Ukrainian biolabs

Flavinkins

@Flavinkins

Russia formally presented **evidence** of U.S. non-compliance with the **Biological Weapons Convention** in September, stemming from evidence and documents collected by Russia in **Ukrainian biolabs** that were captured by Russian armed forces:

Subsequently, Russia also posed these questions to Ukraine regarding the matters.

The queries revolve around storing inexplicable amounts of **Cholera** and **Anthrax**, which is a violation of the BWC; BTRP-financed studies regarding **migratory birds**; and a particular US patent:

The patent in question, “**Toxic Mosquito Aerial Release System**” or TMARS, is owned by a one S. Mill Calvert, who seemingly understands the legal tenuousness of his invention:

The US response gives the Russian’s queries zero merit and baldly claims they lack credibility.

As justification, the US shields it’s Biological Threat Reduction Program activities in Ukraine as falling under the confines of Article X of the Biological Weapons Convention: @realrogerwilc0

1. **Anomalies regarding the Caspian sea in 2019:**

18-sept-2019, China conducted simulated drill, in response to future novel coronavirus outbreak, at the Wuhan Tianhe Airport @zhiyanle @P498506515
